**Application of Andrew Rutledge to rezone properties from R-75 (Residential Medium Lot) zoning district to MR-2 (Medium Density Residential-2) zoning district to allow the construction of single-family attached townhomes, at 1602 Scott Boulevard.**

**PETITION NO:** D10-2022-2264 Z-22-1246095

**PROPOSED USE:** Single-family, attached townhomes.

**LOCATION:** 1602 Scott Boulevard, Decatur, Georgia 30033

**PARCEL NO. :** 18-049-01-012; 18-049-01-013

**INFO. CONTACT:** Brandon White, Planning Manager

**PHONE NUMBER:** 404-371-2155

**PURPOSE:**

Application of Andrew Rutledge to rezone properties from R-75 (Residential Medium Lot) zoning district to MR-2 (Medium Density Residential-2) zoning district to allow the construction of single-family attached townhomes. The property is located on the northwest corner of Scott Boulevard and Blackmon Drive, at 1602 Scott Boulevard and 2488 Blackmon Drive in Decatur, Georgia. The property has approximately 315 feet of frontage along Scott Boulevard, 78 feet of frontage along Blackmon Drive and contains 0.92 acre.

**RECOMMENDATION:**

**COMMUNITY COUNCIL:** (Dec. 6, 2022) Approval with conditions. (Oct. 11, 2022) Denial.

**PLANNING COMMISSION:** (January 5, 2023) Full Cycle Deferral. (November 1, 2022) Full Cycle Deferral.

**PLANNING STAFF:** Approval with Conditions.

**STAFF ANALYSIS:** The applicant is requesting a rezoning from the R-75 (Residential Medium Lot-75) Zoning District to MR-2 (Medium Density Residential-2) Zoning District for development of a 15-unit townhome community. The requested rezoning to MR-2 is consistent with the *Comprehensive Plan*. The subject property is located in the Town Center (TC) future land use character area, which includes MR-2 as a permissible zoning district (pg. 93). Also, the subject property is located in Tier II of the *Medline LCI Plan* study area. Recommendations for Tier II include medium density residential uses, 2-4 story buildings, and a density range of 15-20 dwelling units per acre (15-20DUs/acre). The proposal is consistent with the small area plan. The applicant is requesting a density bonus of 6 dwelling units per acre (6 DUs/acre) for a maximum density of 18 dwelling units per acre (18 DUs/acre). In exchange for the density bonus, the applicant proffers the installation of a pocket park as enhanced open space. The proposed zoning appears to be suitable based on its surroundings. The proposal provides an appropriate land use transition from more intense uses/zoning across Scott Boulevard to nearby single-family, detached residential uses west of the subject property. Moreover, the subject property abuts a condominium development to its north. cursory review of the proposed site plan revealed the following: school impacts, at all levels, are estimated to be minimal; proposed parking is adequate; and a 50-foot, Type C, vegetated buffer is required adjacent to MR-1 and R-75 zoned properties. Variances will be required, based on the present design. Based upon review of Section 7.3.5. of the *Zoning Ordinance*, staff recommends “Approval, with conditions”.

**PLANNING COMMISSION VOTE: (January 5, 2023) Full Cycle Deferral to the March 2023 zoning agenda 9-0-0.** April Atkins moved, Jon West seconded for a Full Cycle Deferral to draft conditions for this proposal. **(November 1, 2022) Full Cycle Deferral 8-0-0.** April Atkins moved, LaSonya Osler seconded for a full cycle deferral to the January 2023 zoning agenda, per Staff recommendation.

**COMMUNITY COUNCIL VOTE/RECOMMENDATION: (Dec. 6, 2022) Approval with conditions 8-0-1.** 1) Underground water system shall meet or exceed County standards; and, 2) HOA has agreement regarding maintenance of pocket park. **(Oct. 11, 2022) Denial 6-3-0.** The Council had concerns with the proposed buffer along the edge of the parcel. They were also concerned with destabilizing Blackmon Drive and wanted to know if units in the development could be removed. Additionally, there was significant discussion about the proposed location of pocket park.

**Z-22-1246095 (2022-2264)**  
**Recommended Conditions**  
**January 16, 2023**

1. The subject property shall be developed for a maximum of 15 single-family, attached; fee-simple, townhome lots. Locations of proposed lots, open space, transitional buffers, etc. shall be generally consistent with the locations shown on the site plan dated, 12/2/2022, and entitled *Scott Townhomes*.
2. Maximum allowable density shall not exceed 20.4 dwelling units per acre. In exchange for bonus density, the developer shall provide open space and a pocket park as shown on the site plan. The developer shall coordinate with the County Public Works Department to obtain unused, excess right-of-way for the pocket park.
3. Developer shall comply with the zoning requirement of providing an undisturbed, vegetated transitional buffer along the north and west property lines. Whereas the Developer is seeking to reduce the minimum required width of the transitional buffer, it shall not be any less than twenty (20) feet along the northern property line nor less than fifteen (15) feet along the western property line, if approved by the Board of Zoning Appeals.
4. The approval of this rezoning application by the Board of Commissioners shall have no bearing on the requirements for other regulatory approvals under the authority of the Zoning Board of Appeals or other entity whose decision should be based on the merits of the application under review by such entity.

**Staff Recommendation:** Approval with conditions.

The applicant is requesting a rezoning from the R-75 (Residential Medium Lot-75) Zoning District to MR-2 (Medium Density Residential-2) Zoning District for development of a 15-unit townhome community. The requested rezoning to MR-2 is consistent with the *Comprehensive Plan*. The subject property is located in the Town Center (TC) future land use character area, which includes MR-2 as a permissible zoning district (pg. 93). Also, the subject property is located in Tier II of the *Medline LCI Plan* study area. Recommendations for Tier II include medium density residential uses, 2-4 story buildings, and a density range of 15-20 dwelling units per acre (15-20DUs/acre). The proposal is consistent with the small area plan.

The applicant is requesting a density bonus of 6 dwelling units per acre (6 DUs/acre) for a maximum density of 18 dwelling units per acre (18 DUs/acre). In exchange for the density bonus, the applicant proffers the installation of a pocket park as enhanced open space. The proposed zoning appears to be suitable based on its surroundings. The proposal provides an appropriate land use transition from more intense uses/zoning across Scott Boulevard to nearby single-family, detached residential uses west of the subject property. Moreover, the subject property abuts a condominium development to its north.

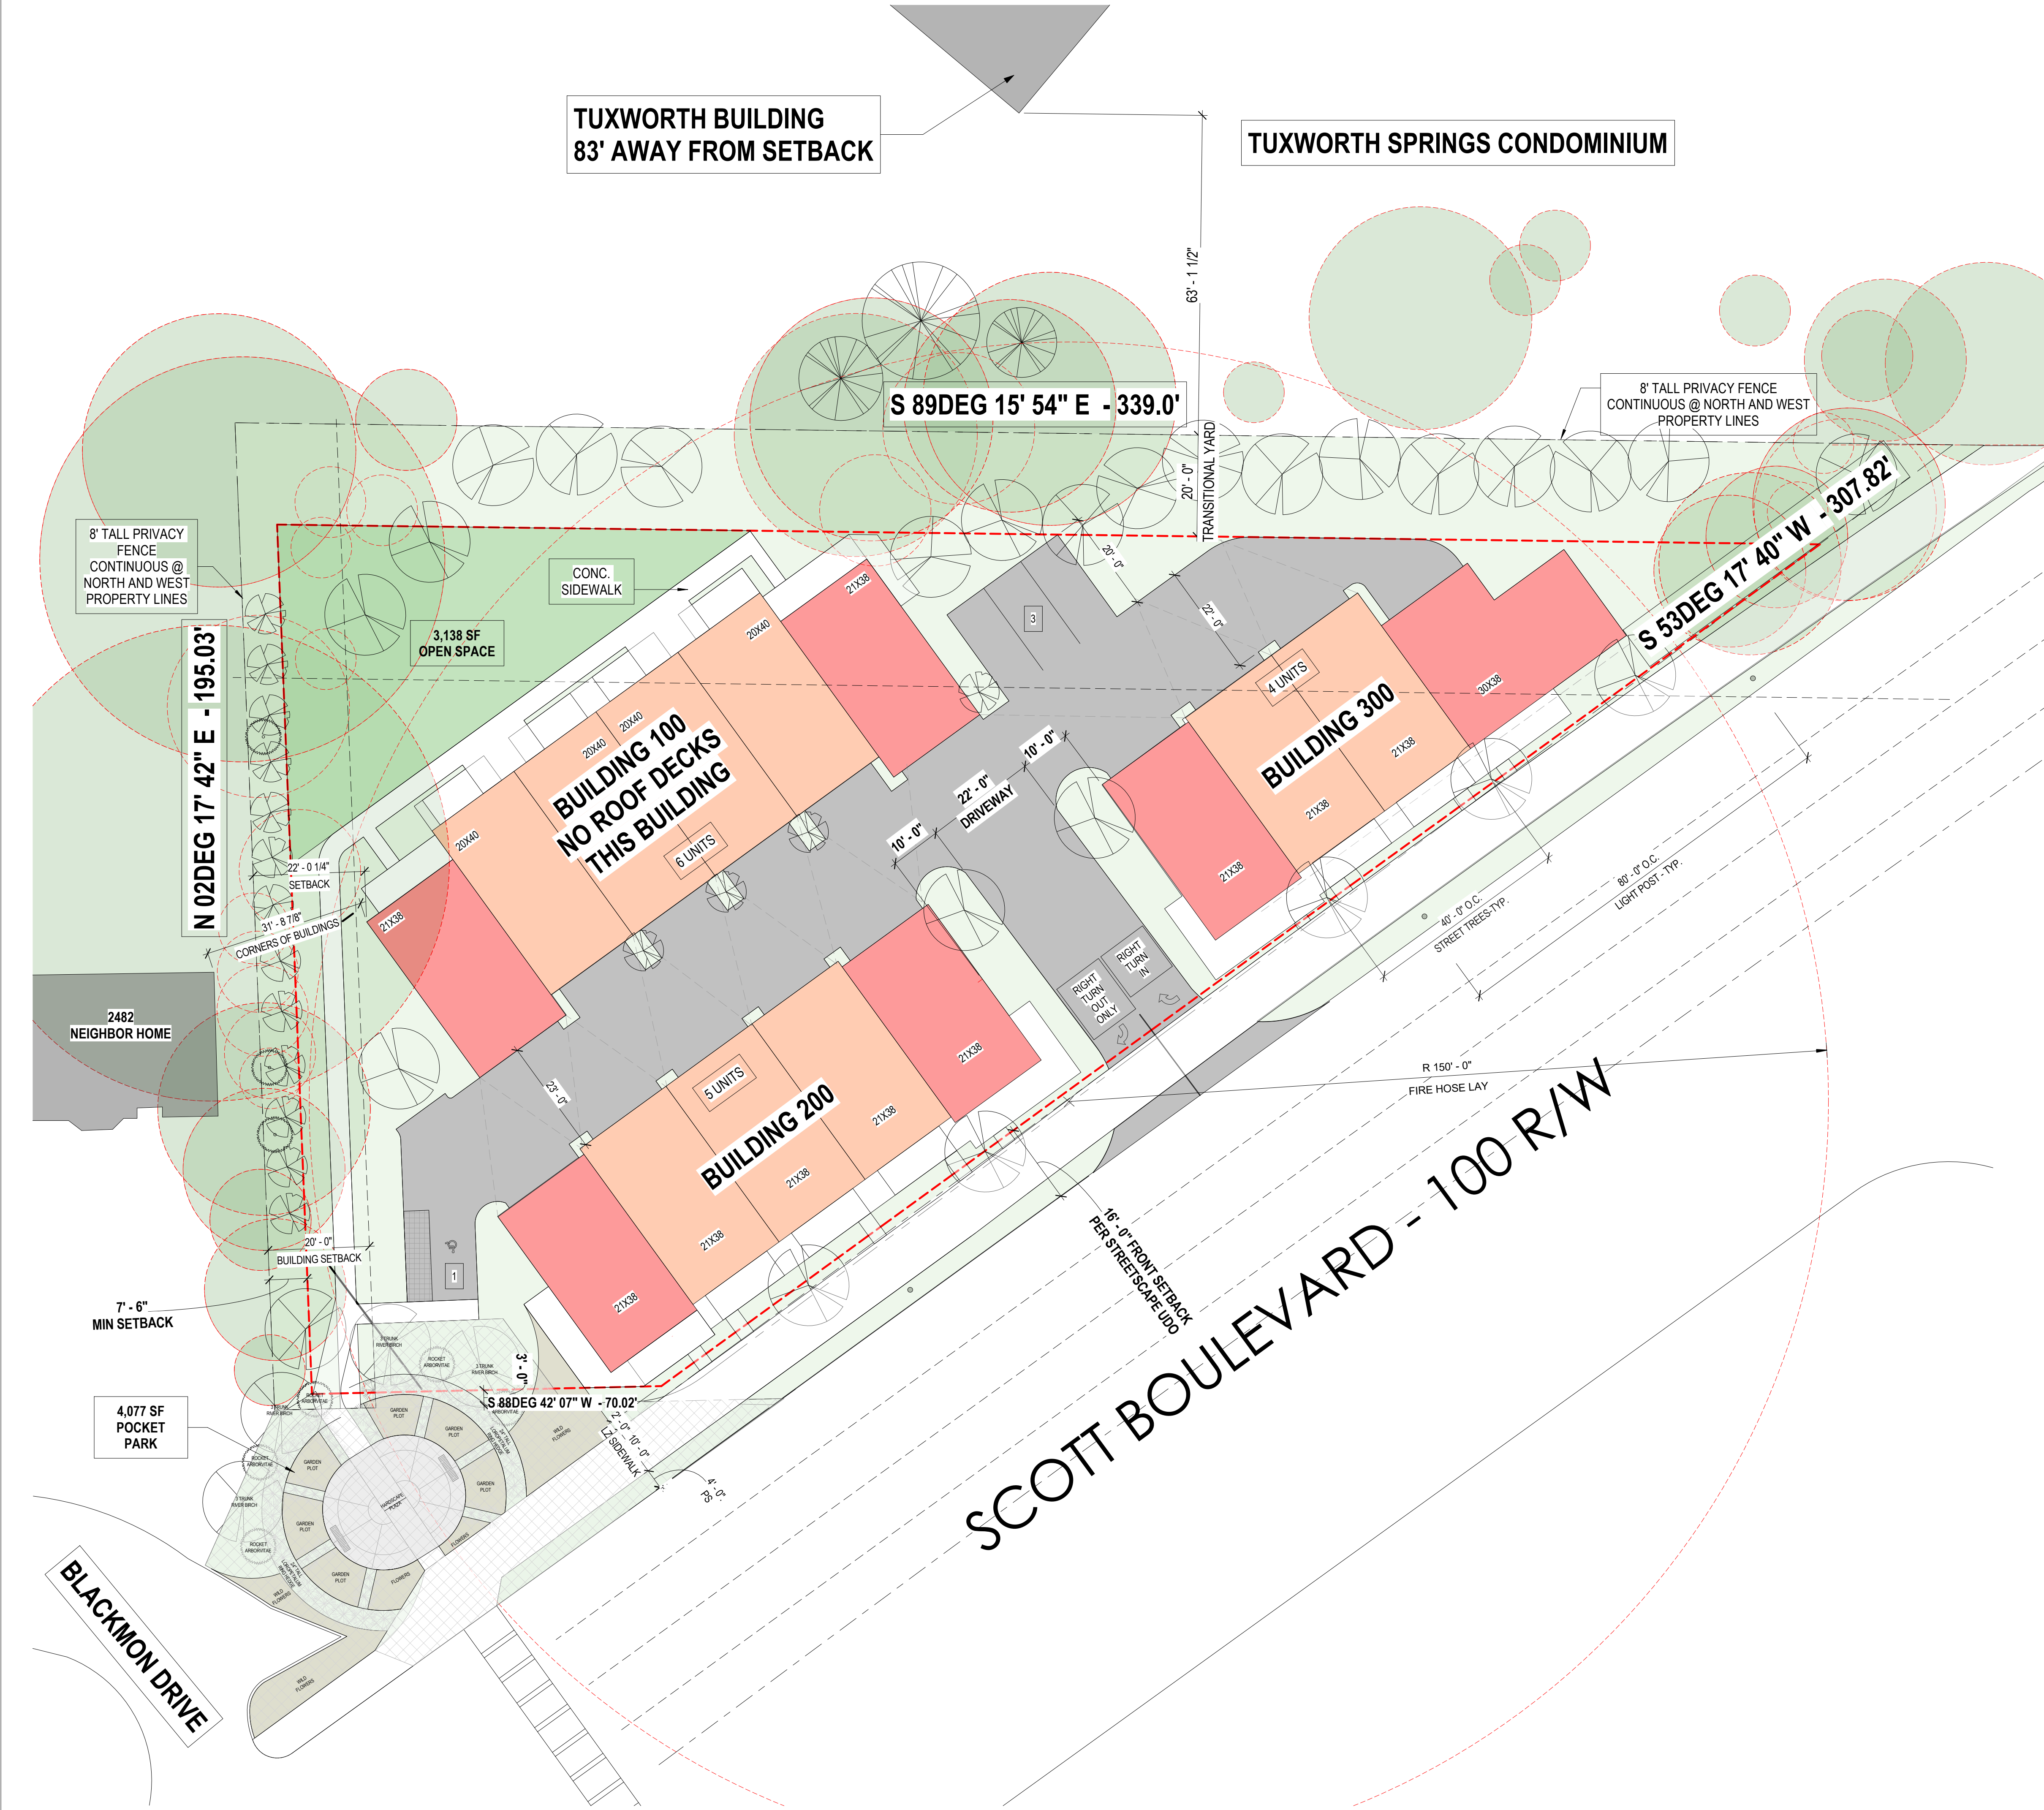

Cursory review of the proposed site plan revealed the following: school impacts, at all levels, are estimated to be minimal; proposed parking is adequate; and a 50-foot, Type C, vegetated buffer is required adjacent to MR-1 and R-75 zoned properties. Variances will be required, based on the present design.

Based upon review of Section 7.3.5. of the *Zoning Ordinance*, staff recommends approval with the following conditions:

1. The subject property shall be developed for a maximum of 15 single-family, attached; fee-simple, townhome lots. Locations of proposed lots, open space, transitional buffers, etc. shall be generally consistent with the locations shown on the site plan dated, 12/2/2022, and entitled *Scott Townhomes*.
2. Maximum allowable density shall not exceed 20.4 dwelling units per acre. In exchange for bonus density, the developer shall provide open space and a pocket park as shown on the site plan. The developer shall coordinate with the County Public Works Department to obtain unused, excess right-of-way for the pocket park.
3. Developer shall comply with the zoning requirement of providing an undisturbed, vegetated transitional buffer along the north and west property lines. Whereas the Developer is seeking to reduce the minimum required width of the transitional buffer, it shall not be any less than twenty (20) feet along the northern property line nor less than fifteen (15) feet along the western property line, if approved by the Board of Zoning Appeals.
4. The approval of this rezoning application by the Board of Commissioners shall have no bearing on the requirements for other regulatory approvals under the authority of the Zoning Board of Appeals or other entity whose decision should be based on the merits of the application under review by such entity.

Re: Rezone Application Review

General Comments:

DeKalb County Health Regulations prohibit use of on-site sewage disposal systems for

- multiple dwellings
- food service establishments
- hotels and motels
- commercial laundries
- funeral homes
- schools
- nursing care facilities
- personal care homes with more than six (6) clients
- child or adult day care facilities with more than six (6) clients
- residential facilities containing food service establishments

If proposal will use on-site sewage disposal, please contact the Land Use Section (404) 508-7900.

Any proposal, which will alter wastewater flow to an on-site sewage disposal system, must be reviewed by this office prior to construction.

This office must approve any proposed food service operation or swimming pool prior to starting construction.

Public health recommends the inclusion of sidewalks to continue a preexisting sidewalk network or begin a new sidewalk network. Sidewalks can provide safe and convenient pedestrian access to a community-oriented facility and access to adjacent facilities and neighborhoods.

For a public transportation route, there shall be a 5ft. sidewalk with a buffer between the sidewalk and the road. There shall be enough space next to sidewalk for bus shelter's concrete pad installation.

Since DeKalb County is classified as a Zone 1 radon county, this office recommends the use of radon resistant construction.

## Zoning Comments – October 2022

- N1.** No package to review.
- N2. 1845 Lawrenceville Hwy.** Lawrenceville Hwy is a state route. GDOT review and approval required prior to permitting. Lawrenceville Hwy is classified as a major arterial. Requires a right of way dedication of 50 feet from centerline OR such that all public infrastructure is within right of way, whichever greater. Add ADA Ramps and a pedestrian crossing across Jordan Lane. Requires a 5-foot landscape strip with a 10 foot multi-use path. No poles may remain within the limits of the path. Requires pedestrian scale streetlights. Jordan Lane is classified as a local road. Requires a right of way dedication of 27.5 feet from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires 12-foot travel lane from centerline with curb and gutter. Requires a 5-foot landscape strip with a 5-foot sidewalk. Requires pedestrian scale streetlights. No poles may remain within the limits of the sidewalk. Driveway on Jordan Lane cannot be relocated without Transportation approval- proposed location acceptable.
- N3. 1251 Robinwood Rd.** Build 5 foot sidewalks in front of the subject property and extend to Lawrenceville Hwy within the current right of way. Robinwood Rd is classified as a local road. Requires a right of way dedication of 27.5 feet from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires 12 foot travel lane from centerline with curb and gutter. Requires a 5 foot landscape strip with a 5 foot sidewalk on right of way. Requires pedestrian scale streetlights. Street parking within the right of way must be approved by Roads & Drainage prior to permitting. No poles may remain within the limits of the sidewalk. Interior streets/alleys must be private.
- N4. 3458 Mountain Drive.** Mountain Drive is a state route and requires GDOT review and approval prior to permitting. Requires traffic study to determine required number of lanes and queue lengths at entrances. The study will also determine the need for left turn lanes into the development. Mountain Drive is classified as a collector road. Requires a right of way dedication of 35 from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires a 5 foot landscape strip with a 10 foot multi-use path. No poles may remain within the limits of the path. Requires pedestrian scale streetlights. Speed Limit is 45 mph (per plans). Watch minimum driveway separation spacing in Sec 14-200(6). Speed Limits between 36 to 45mph requires 245 feet of separation between driveways. Developments with 151-300 residential units require 3 access points (Land development Code Sec 14-200(5).) Suggest that if you are seeking a variance that you do it within the zoning process. Interior street must be private.
- N5. 6168 Marbut Rd.** No parking allowed on Marbut Road.
- N6/N7. 2179 Bouldercrest Road.** Bouldercrest Road is classified as a major arterial. Requires a right of way dedication of 50 from centerline OR such that all public infrastructure is within right of way, whichever greater. Replace curbing along property frontage. Requires a 5 foot landscape strip with a 10 foot multuse path. No poles may remain within the limits of the path. Requires pedestrian scale streetlights. No Parking allowed within the right of way.
- N8. 3507 Memorial Drive.** Memorial Drive is a state route. GDOT review and approval required prior to permitting. No comment. Based on the plan, this site it interior to the property and not adjacent to a right of way.

- N9. 311 South Howard St.** (They have the wrong address on the application. It is 211 South Howard Street.) Memorial Drive is a state route within the City of Atlanta. Both agencies will have to review and approve the requirements prior to permitting. For DeKalb: Memorial Drive requires a right of way dedication of 50 foot from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires a 5 foot landscape strip with a 10 foot mulituse path. No poles may remain within the limits of the path. Requires pedestrian scale streetlights. DeKalb Transportation will defer to the City of Atlanta comments for right of way improvements. South Howard St is classified as a collector street. South Howard Street requires a right of way dedication of 35 feet from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires a 5 foot landscape strip with a 10 foot mulituse path. No poles may remain within the limits of the path. Requires pedestrian scale streetlights. Access point must remain at the southern property line on South Howard St. Interior private alley (instead of a shared drive for permitting) must be private. Shared drives not allowed for 6 lots, private alley in this case is allowed.
- N10. 1347 Bermuda Road.** By Code- shared driveways can only be for 2 lots. A variance will be necessary to have 6 lots on a shared driveway. Suggestion: widen to 24 feet and make it a private road. Bermuda Road is classified as a collector road. requires a right of way dedication of 35 from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires a 5 foot landscape strip with a 10 foot mulituse path. No poles may remain within the limits of the path. Requires pedestrian scale streetlights. Watch minimum separation of drives/roads in section 14-200(6) based on the speed limit of the road.
- N11. 8067 Rockbridge Road.** No Access on The Trace. Rockbridge Road is classified as a major arterial. Requires a right of way dedication of 50 feet from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires a 5 foot landscape strip with a 10 foot mulituse path. No poles may remain within the limits of the path. Requires pedestrian scale streetlights. The Trace is classified as a local road. Requires a right of way dedication of 27.5 feet from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires a 5 foot landscape strip with a 5 foot sidewalk path. No poles may remain within the limits of the sidewalk. Requires pedestrian scale streetlights. This property is within the interior of a curve. Intersection sight distance exiting the property (based on AASHTO guidance and sealed by a professional engineer) must be met prior to permitting. Guardrail resign must also take place by a professional engineer along the Rockbridge frontage.
- N12. 1065 Fayetteville Rd.** Fayetteville Road is classified as a collector road. Requires a right of way dedication of 35 feet from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires a 5 foot landscape strip with a 10 foot mulituse path. No poles may remain within the limits of the path. Requires pedestrian scale streetlights. Graham Circle is classified as a local road. Requires a right of way dedication of 27.5 feet from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires a 12 foot travel lane from centerline of road. Requires a 5 foot landscape strip with a 5 foot sidewalk path. No poles may remain within the limits of the sidewalk. Requires pedestrian scale streetlights. Interior streets are shown on site plan as private. If they become public: Requires a right of way dedication of 55 feet. Requires a 5 foot landscape strip with a 6 foot sidewalk. No poles may remain within the limits of the sidewalk. Requires pedestrian scale streetlights.
- N13. 2255, 3375, 3395 Northeast Expressway.** All access is from GDOT right of way. GDOT review and permits required. Further discussions required around the Peachtree Greenway Trail connection. All public infrastructure must be on right of way.
- N14. 1602 Scott Blvd.** Scott Blvd is a state route. GDOT review and approval required prior to permitting. Scott Blvd is classified as a major arterial. Requires a right of way dedication of 50 feet from centerline OR such that all public infrastructure is within right of way, whichever greater. Requires a 5 foot landscape strip with a 10 foot mulituse path. Extend Path to and along Blackmon Drive frontage. No poles may remain within the limits of the path. Requires pedestrian scale streetlights. All interior streets to be private. No access allowed on Blackmon Drive Right in right out only allowed on Scott Blvd- with proper design to prohibit restricted movements.
- N15. 2739 Craigie Ave.** No comment.
- N16. 1259 Sheppard Ct.** No comment.

**N17/N18.** Not in package to review.

## DEKALB COUNTY GOVERNMENT PLANNING DEPARTMENT DISTRIBUTION FORM

The following areas below may warrant comments from the Development Division. Please respond accordingly as the issues relate to the proposed request and the site plan enclosed as it relates to Chapter 14. You may address applicable disciplines.

### DEVELOPMENT ANALYSIS:

- **Storm Water Management**

Compliance with the Georgia Stormwater Management Manual, DeKalb County Code of Ordinances 14-40 for Stormwater Management and 14-42 for Storm Water Quality Control **(sections have been amended recently; please request the amended chapter)**, to include Runoff Reduction Volume where applicable is required as a condition of land development permit approval. Use Volume Three of the G.S.M.M. for best maintenance practices. Use the NOAA Atlas 14 Point Precipitation Data set specific to the site. Recommend Low Impact Development features/ Green Infrastructure be included in the proposed site design to protect as much as practicable the statewaters and special flood hazard areas.

**Conceptual plan doesn't indicate the location of the stormwater management facility. Location of stormwater management shall be shown or compliance with the County stormwater management regulations shall be explained.**

**Additional consideration must be given to the 10% downstream analysis.**

**Runoff Reduction Volume shall be provided unless technical justification is provided regarding the unfeasibility. Strongly recommend investigating the site and identify location where RRv can be provided and re-design/revise the layout to comply with the RRv requirement.**

**Per the County codes, the hydrology analysis must consider the site as wooded for the pre-development conditions**

- **Flood Hazard Area/Wetlands**

The presence of FEMA Flood Hazard Area was not indicated in the County G.I.S. mapping records for the site; and should be noted in the plans at the time of any land development permit application. Encroachment of flood hazard areas require compliance with Article IV of Chapter 14 and FEMA floodplain regulations.

- **Landscaping/Tree Preservation**

Landscaping and tree preservation plans for any building, or parking lot must comply with DeKalb County Code of Ordinances 14-39 as well as Chapter 27 Article 5 and are subject to approval from the County Arborist.

- **Tributary Buffer**

State water buffer was not reflected in the G.I.S. records for the site. Typical state waters buffer have a 75' undisturbed stream buffer and land development within the undisturbed creek buffer is prohibited without a variance per DeKalb County Code of Ordinances 14-44.1

Please provide additional information relating to the following statement.

According to studies conducted by the Institute of Traffic Engineers (ITE) 6/7<sup>TH</sup> Edition (whichever is applicable), churches generate an average of fifteen (15) vehicle trip end (VTE) per 1,000 square feet of floor area, with an eight (8%) percent peak hour factor. Based on the above formula, the \_\_\_\_\_ square foot place of worship building would generate \_\_\_\_\_ vehicle trip ends, with approximately \_\_\_\_\_ peak hour vehicle trip ends.

Single Family residence, on the other hand, would generate ten (10) VTE's per day per dwelling unit, with a ten (10%) percent peak hour factor. Based on the above referenced formula, the \_\_\_\_\_ (Single Family Residential) District designation which allows a maximum of \_\_\_\_\_ units per acres, and the given fact that the project site is approximately \_\_\_\_\_ acres in land area, \_\_\_\_\_ daily vehicle trip end, and \_\_\_\_\_ peak hour vehicle trip end would be generated with residential development of the parcel.

### IMPACT ANALYSIS

**(Please respond to the following standards and factors on a separate sheet.)**

Section 27-7.3.5. The following standards and factors are found to be relevant to the exercise of the county's zoning powers and shall govern the review of all proposed amendments to the Official Zoning Map:

- A. Whether the zoning proposal is in conformity with the policy and intent of the Comprehensive Plan.
- B. Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby properties.
- C. Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned.
- D. Whether the zoning proposal will adversely affect the existing use or usability of adjacent or nearby properties.
- E. Whether there are other existing or changing conditions affecting the use and development of the property which give supporting grounds for either approval or disapproval of the zoning proposal.
- F. Whether the zoning proposal will adversely affect historic building, sites, districts, or archaeological resources.
- G. Whether the zoning proposal will result in a use which will or could cause excessive or burdensome use of existing streets, transportation facilities, utilities, or schools.
- H. Whether the zoning proposal adversely impacts the environment or surrounding natural resources.

## IMPACT ANALYSIS

1602 SCOTT BLVD & 2488 BLACKMON DRIVE, DECATUR, GA 30033

*(Please respond to the following standards and factors on a separate sheet.)*  
*Section 27-7.3.5. The following standards and factors are found to be relevant to the exercise of the county's zoning powers and shall govern the review of all proposed amendments to the Official Zoning Map:*

- A. *Whether the zoning proposal is in conformity with the policy and intent of the Comprehensive Plan.*

The proposed rezoning of this property from R-75 Single-family to MR-2 Single-family attached is in conformity to the intent of the Comprehensive Plan. The property is located in the "Town Center" which encourages Tier III density [3-4 story density] along the Scott Corridor.

- B. *Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby properties.*

The proposed rezoning of this property will encourage similar development along the Scott Corridor which is in keeping with the desire of the Comprehensive plan.

- C. *Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned.*

The current property is be under-utilized by 2 existing single-family homes which have become undesirable along the arterial 6-lane corridor of Scott Boulevard. The best economic use of the property is Multi-family and/or Commercial which is verified by the Comprehensive Plan and planning studies conducted by the County.

- D. *Whether the zoning proposal will adversely affect the existing use of usability of adjacent or nearby properties.*

LISTEN. THINK. DESIGN.

The proposed rezoning will not adversely affect the existing use of either of the adjacent properties. The closest corner of our proposed development to the existing corner of Tuxworth Condominiums is 92' and located on obtuse angles from one another.

- E. Whether there are other existing or changing conditions affecting the use and development of the property which give supporting grounds for either approval or disapproval of the zoning proposal.*

The proposal follows all property use and development recommendations of the Comprehensive Plan created by Dekalb County which gives supporting grounds for the approval of this zoning proposal.

- F. Whether the zoning proposal will adversely affect historic building, sites, districts, or archaeological resources.*

There are no know historic building, sites, districts, or archaeological resources on the site or adjacent to the property and this proposal will not adversely affect any if they exist.

- G. Whether the zoning proposal will result in a use which will or could cause excessive or burdensome use of existing streets, transportation facilities, utilities, or schools.*

The proposal is for 15 attached single-family townhomes and will not cause excessive or burdensome use of existing streets, transportation facilities, utilities, or schools.

- H. Whether the zoning proposal adversely impacts the environment or surrounding natural resources.*

This development will reduce the water runoff, which occurs on the surrounding properties, through the new construction of a underground storm sewer retention system. Our landscape buffers and new tree planting will aid in screening and preserving the surrounding wooded habitats and should have no adverse impact on the environment or natural resources.
