N2. Case No: A-26-1247990

Parcel ID(s): 15 237 01 016

Commission District 02 Super District 06

Applicant: Caren Ann Nunnally
107 Spencer Way
Athens, GA 30607

Owner: Francisco Duque and Ali Schwartz Duque
2150 East Lake Road NE
Atlanta, GA 30307

Project Name: 2150 East Lake Road – ADU Replacement

Location: 2150 East Lake Road NE, Atlanta, GA 30307

Requests: Variance request from Section 27-2.2.1 of the DeKalb County Zoning Ordinance to reduce the required rear yard setback from 40 feet to 3 feet and reduce the required side yard setback from 8.5 feet to 3 feet to facilitate demolition and replacement of an existing accessory dwelling unit in the R-85 (Residential Medium Lot-85) zoning district and Druid Hills Historic District.

Staff Recommendation: Approval with conditions

Conditions:

- 1. The following information about this variance shall be noted on any site plan prepared for the subject property: case number, approval date, type of variance and condition(s) of approval.

STAFF FINDINGS:

The subject property is located at 2150 East Lake Road NE and contains an existing single-family residence with an accessory dwelling unit. The parcel is 0.422 acres, zoned R-85, designated Traditional Neighborhood (TN), and located within the Druid Hills Historic District overlay. The applicant proposes to replace the existing one-story ADU with a new two-story ADU in substantially the same building footprint and the impervious area would remain at 33.56 percent, below the maximum 35 percent permitted in the R-85 zoning district.

1. There is an extraordinary or exceptional physical condition(s) pertaining to the particular piece of property (such as, but not limited to, lot size, lot shape, specimen tree(s), steep slope(s), or preservation of historic characteristics of the property), which was not created by the current owner, previous owner, or applicant; by reason of a clearly demonstrable condition(s), the strict application of the requirements of this chapter would deprive the property owner of rights and privileges enjoyed by other property owners in the same zoning district, as distinguished from a special privilege or convenience sought by the property owner.

The record supports that the rear portion of the site is constrained by the placement of the principal dwelling and mature vegetation. The applicant states that the main house is placed directly in the middle of the buildable envelope, leaving limited room in the rear yard, and the materials depict mature trees and fencing adjacent to the existing ADU location. While the hardship is not based on topography, staff finds that the combination of existing site layout and physical constraints in the rear yard distinguishes this property from a typical unconstrained lot in the district.

2. The requested variance does not go beyond the minimum necessary to afford relief, and does not constitute a grant of special privilege inconsistent with the limitations upon other properties in the zoning district in which the subject property is located:

The request appears limited to the minimum relief necessary. The application does not seek lot coverage relief, additional use rights, or expansion into new portions of the rear yard. Instead, it seeks to replace an existing ADU in substantially the same location already occupied by that structure. The applicant also states that utilities, grading, and parking are already in place and that relocation would create additional site disturbance. The variance request is narrowly tailored to allow replacement of an existing encroaching structure rather than creation of a new development pattern.

While the proposed ADU is two-stories, which would be an increase in non-conformity from the prior one-story structure as indicated in the survey, the scope of this variance request is limited to setback reductions and supplemental regulations, and other dimensional requirements would be applied at the permitting stage.

3. The grant of the variance will not be materially detrimental to the public welfare or injurious to the property or improvements in the zoning district in which the subject property is located:

The request is not likely to be materially detrimental to the public welfare as the use of the property would remain residential, and the applicant states that the project is not expected to increase noise or traffic because it is replacing an existing ADU rather than introducing a new land use. The submitted materials also indicate that trees, fencing, and the existing placement of accessory features help buffer the structure from adjoining properties. In addition, the Historic Preservation Commission approved the proposed work and found that it would not have a substantial adverse effect on the historic district.

4. The literal interpretation and strict application of the applicable provisions or requirements of this chapter would cause undue and unnecessary hardship:

Strict application of the setback requirements would prevent replacement of the existing ADU in its established location and would likely require relocation of the structure, utilities, and associated improvements to another area of the site. The applicant states that such relocation would diminish the functionality of the rear yard and may require unnecessary driveway and utility arrangements. Given the existing site layout, limited rear buildable area, and mature vegetation shown in the plans and exhibits.

5. The requested variance would be consistent with the spirit and purpose of this Chapter and the DeKalb County Comprehensive Plan Text:

The subject property is within the Traditional Neighborhood character area, and the pre-application materials indicate that this designation supports infill development and broader housing diversity goals in older established neighborhoods. The proposal is also within the Druid Hills Historic District, and the Historic Preservation Commission approved the replacement design and issued a Certificate of Appropriateness. Staff finds that allowing replacement of the existing ADU in substantially the same location is consistent with the spirit of the ordinance, as the request accommodates an established site condition while maintaining neighborhood compatibility and historic review oversight.

FINAL STAFF ANALYSIS:

The applicant seeks setback relief to replace an existing accessory dwelling unit in substantially the same location on a historically developed residential lot. The request is limited in scope, does not require lot coverage relief, and is supported by a site plan stating that there will be no measurable grading or earth movement. The record further shows that the project has already received Historic Preservation Commission approval within the Druid Hills Historic District. The existing site layout presents constrained rear yard conditions and to avoid additional disturbance this request for limited relief. Staff therefore recommends approval subject to conditions.

Staff Recommendation: Approval with conditions

Conditions:

1. The following information about this variance shall be noted on any site plan prepared for the subject property: case number, approval date, type of variance and condition(s) of approval.

Letter of Intent

Subject: Variance Request for Right Side and Rear Yard Setback Reduction – Chapter 27
Section 2.2.1 – Removing Existing ADU to replace with new ADU in EXACT same location

Dear Members of the Zoning Board of Appeals,

We the homeowners, Francisco Duque and Ali Schwartz Duque, are writing to formally request a variance from Chapter 27, Section 2.2.1 of the DeKalb County Zoning Ordinance. Our request pertains to the reduction of the right side and rear yard setback requirements for our property located at 2150 East Lake Rd NE, Atlanta, GA 30307. The purpose of this variance is to facilitate the replacement of an existing ADU with an in kind ADU in the exact same footprint as it currently exists (see Exhibit A). We are requesting to reduce the rear yard setback from 40' to 3' and reduce the side yard setback from 8.5' to 3' (see Exhibit B-1 & B-2). We are seeking a variance to allow us to replace in kind the ADU which is important for the improvement of our property. The current ADU (see Exhibit C) does not fit the aesthetics of the home or the neighborhood. It was built in 1950 and has not been updated since that time. As the neighborhood has grown and developed, this ADU has become unappealing to the area. Updating it with an in kind ADU would bring it up to code and enhance the quality of the neighborhood (see exhibit D).

The plans for the demolition of the current ADU and construction of the new in kind ADU were approved by the HPC on 12/2/2025 (see Exhibit E-1 & E-2) and the COA was issued on 12/4/25.

1. Physical Conditions of the Site:

The existing ADU, which was constructed in 1950, limits the buildable areas within the setbacks as the main house is placed directly in the middle of the buildable envelope, therefore leaving very little room in the rear yard (see Exhibit F). The Historic Preservation Commission has already approved the replacement in kind of the ADU. The makeup of the tree, fence and accessory structure buffers between living units helps with privacy concerns.

2. Minimum Variance Necessary:

This request is to ask solely for the minimum variance necessary to replace the existing ADU in the exact same location. The utilities, grading and parking are

already in place and would have to be added in an alternate location. There will be limited disturbances to the property, trees, grading and natural conditions. We are just looking to ensure that we can have functionality of our rear yard and space for recreation on our property and we are not seeking any advantages beyond those available to other property owners in the same zoning district.

3. Public Welfare:

We do not expect any negative impact on the neighborhood and community as we are not changing the use of the property, only replacing in kind the existing ADU. The change is not expected to increase noise in the area or lead to any additional traffic to the area. The proposed reduced setback of the rear and side yards will not pose any harm to public welfare, neighboring properties, or the overall improvements in the R-85 zoning district.

4. Ordinance Hardship:

A strict interpretation of the zoning laws, in this case, would cause undue hardship for us. Limited buildable rear yard space would ruin functionality of rear space and may require extensive and unnecessary additions such as a driveway and utility arrangements. This variance is essential to prevent unnecessary hardship and allow for reasonable use of our property.

5. Alignment with the Spirit of the Law:

We believe that our variance request would be consistent with the spirit and purpose of this chapter and the DeKalb County Comprehensive Plan. It also aligns with the intent of the Traditional Neighborhood Character Area and will preserve the style and appeal of older traditional neighborhood communities. These areas primarily consist of residential areas in older parts of the community. We have already received approval from the HPC (see Exhibit E-1 & E-2) for this project and feel it supports infill developments and county goals of expanding housing options and housing diversity.

In conclusion, we appreciate your time and consideration of our variance request. We are committed to working collaboratively to ensure that the proposed changes align with the broader goals and policies of DeKalb County.

Sincerely,
Francisco Duque & Ali Schwartz Duque
