Dear Hearn Road Residents:

As part of DeKalb County's Capital Improvement Program, the Department of Watershed Management (DWM) has initiated a project to replace a sanitary sewer lift station at 4317 Hearn Road to better serve your community. As part of the Hearn Road Lift Station Replacement Project, crews will dig a wet well 30 feet deep and install pumps along with a tie-in to existing sewer pipes.

This letter serves as formal notification that county contractors are scheduled to begin major construction activities for this project on Tuesday, September 5, 2017.

Normal construction hours will be from 8:00 a.m. to 5:00 p.m. Monday through Friday, excluding major holidays. However, in some instances, there may be expanded work hours associated with this project. Residents will receive prior notification should any major schedule changes be required.

Project construction is expected to last from **September 2017-March 2018**, with sewer pumping operational by December 31, 2017. Reeves + Young, working on behalf of DeKalb County, is the authorized contractor for the Hearn Road Lift Station Replacement Project. All workers will be wearing proper identification and driving marked vehicles.

Based on equipment and materials needs, there will be an increase in heavy equipment traffic at certain times during construction. In addition, there may be some one-lane closures directly in front of the project site, which could cause traffic delays. Traffic safety and control measures will be implemented as needed to assist drivers in moving safely and orderly through the construction zone. Residents within the area of impact will be notified 72 hours in advance of any full road closures or restricted driveway access associated with the closures.

Should you have any questions or concerns regarding the Hearn Rd Lift Station Replacement Project, please contact the DWM Project Information line at 1-800-986-1108 or email projectinfo@dekalbcountyga.gov.

We appreciate your patience as we work diligently to make improvements to DeKalb County's water system.

Sincerely,

Margaret Tanner, P.E.
Deputy Director
