

# **EXPRESS PERMIT PROCESS FOR SMALL-SCALE PV** SYSTEMS MICRO-INVERTER

### Required Information for Permit:

- 1. Site plan showing location of major components on the property. This drawing need not be exactly to scale, but it should represent relative location of components at site (see supplied example site plan). PV arrays on dwellings with a 3' perimeter space at ridge and sides may not need separate fire service review.
- 2. Electrical diagram showing PV array configuration, wiring system, overcurrent protection, inverter, disconnects, required signs, and ac connection to building (see supplied standard electrical diagram).
- 3. Specification sheets and installation manuals (if available) for all manufactured components including, but not limited to, PV modules, inverter(s), combiner box, disconnects, and mounting system.

# Step 2: Electrical Review of PV System (Calculations for Electrical Diagram)

In order for a PV system to be considered for an expedited permit process, the following must apply:

- 1. PV modules, utility-interactive inverters, and combiner boxes are identified for use in PV systems.
- 2. The PV array is composed of 4 series strings or less per inverter.
- 3. The total inverter capacity has a continuous ac power output 13,440 Watts or less
- 4. The ac interconnection point is on the load side of service disconnecting means (690.64(B)).
- 5. One of the standard electrical diagrams (E1.1, E1.1a, E1.1b, or E1.1c) can be used to accurately represent the PV system.

Fill out the standard electrical diagram completely. A guide to the electrical diagram is provided to help the applicant understand each blank to fill in. If the electrical system is more complex than the standard electrical diagram can effectively communicate, provide an alternative diagram with appropriate detail.

Fill out the standard electrical diagram completely. A guide to the electrical diagram is provided to help the applicant understand each blank to fill in. If the electrical system is more complex than the standard electrical diagram can effectively communicate, provide an alternative diagram with appropriate detail.

Step 3: Complete Solar Permit Application on the next two pages and sign. Include completed diagrams on pages four, five and six. Complete Tree Affadavit.

Step 4: Submit the application, supporting manufacturer's data, Photovoltaic Tree Affidavit and NABSEP certification via an email to Loraine Bell at: lbell@dekalbcountyga.gov or in person at 330 West Ponce De Leon Avenue, 2nd floor, Decatur, GA 30030.

Once approved, submit for an electrical trade permit online at: http://63.170.23.47/DP1/Metroplex/DekalbCounty/permit/WIZ\_APWELCOME.asp
