

FINAL PLAT PROCEDURES AND REQUIREMENTS FOR THE GIS DEPARTMENT **GIS – ADDRESSING**

1. The GIS Department reviews the Final Plat for the following information
 - ◆ Acceptable street names,
 - ◆ Verifies that the project name is acceptable
 - ◆ Assigns street addresses for each lot shown on the final plat
 - ◆ Verifies ownership
 - ◆ Verifies that the lot numbers shown on the plat are legal.
 - ◆ Verifies receipt of completed “Final Plat Mapping Form” for subdivisions, condominiums, townhomes and apartments.

If the above items are acceptable, GIS will approve recording of Final Plat.

2. All corrections are shown on the Final Plat as redline comments and the plat is returned to the applicant for corrections.
3. Once the corrections are revised and re-submitted by the applicant, the corrected Final Plat is distributed to the GIS Department with redlines for re-review.

The GIS Department then signs off on the Final Plat and the sign off sheet is sent to the Development Department.

GIS – MAPPING

1. The GIS Department requires a recorded plat in mapping Subdivisions or Townhomes and requires a recorded preliminary plat “For Addressing Purposes” regarding Condominiums or Townhomes (Fee Simple Attached).
2. Digital (.dwg, .dgn, or .dxf) or Shape file that is in the *State Plane GA West NAD 83 Coordinate US Survey Feet System* is preferred for faster processing.
3. The GIS Department also requires a completed Final Plat Mapping Form to ensure accuracy and efficiency of mapping request.
4. If the Final Plat Mapping Form is approved, then the form is stored in GIS.
5. Once Development forwards the approved final plat and digital file (if provided) to GIS, then GIS will pair together the completed Final Plat Mapping Form and the approved final plat & digital file.
6. Then the project is added onto the list of property mapping requests.
7. Property mapping requests are processed in the order received and is administered by GIS management.
