

Notice of Intent (NOI)

NOI is required for any of the following.

1. New facilities seeking to be covered under the Industrial Stormwater General Permit.
2. There is change of ownership.
3. Submit a copy of the NOI to DeKalb County Roads and Drainage Division.

Notice of Termination(NOT)

NOT must be submitted if...

1. A permittee ceased operation of the activity for which the permit coverage was obtained.
2. Ownership of the facility covered by the permit changes or
3. Permittee has obtained coverage under an individual or alternative general permit for all discharges required to be covered under this permit.

No Exposure Exclusion(NEE)

To obtain exemption from permit coverage, submit a No Exposure Exclusion (NEE) to Georgia EPD.

Owner/operator must conduct quarterly inspections to ensure that the condition of No Exposure is maintained.

Who is Covered?

You are eligible for coverage under the Industrial General Permit, (GAR050000) if you meet the eligibility provisions described in Part 1.1 of the permit which include the following:

- The activities at the facility must be described by one of the SIC Codes or Narrative
- Descriptions included in Part 8 of the permit.
- Stormwater discharges must meet one of the conditions described in Part 1.1.2 of the permit.
- Non-Stormwater discharges must meet one of the conditions described in Part 1.1.3 of the permit.

NPDES Industrial Stormwater Permit

Information Brochure

BEST MANAGEMENT PRACTICES

STORMWATER DISCHARGES

ASSOCIATED WITH

INDUSTRIAL FACILITIES

2024 - 2029

Report suspected illicit discharge, illegal connection or dumping by calling the Stormwater Environmental Comments line at 404-294-2007.

Pollutant of Concern

- Identify Pollutants of concern from your activities.
- Be aware of any benchmark values set.

Monitoring

- Identify all outfalls in and around your facility.
- Have a Stormwater monitoring/sampling program as may be applicable.
- Make available monitoring /sampling results to regulatory inspectors.
- Evaluate your monitoring results for trends that show BMP effectiveness or otherwise.
- Note any exceedance in the monitoring data and document it appropriately.
- Determine if you have comingled discharge with unauthorized discharge under the permit and perform sampling at a point before they mixed together.
- Perform your required monitoring when a measurable storm event (greater than 0.1 inch of rainfall) result in discharge from the facility takes place.

Reporting

- Submit Annual Reports, Discharge Monitoring Reports (DMRs) and other documentations to EPD as may be required.

Stormwater Pollution Prevention Plan

◆ Keep a Copy on Site:

- Prepare and keep a copy of the approved and certified SWPPP on site for regulatory inspection and other uses.

◆ Update Your SWPPP:

- Update the information contained in your SWPPP as often as necessary to reflect changes that has occurred or necessary.

◆ Document Corrective Actions:

- Ensure all corrective actions are performed and documented.

Control Measures

- Implement the required control measures to meet the numeric and non-numeric effluent limits.
- Implement best management practices (BMPs) to eliminate or minimize to the maximum extent practicable, the discharge of pollutants to state waters.
- Prevent stormwater from coming into contact with polluting materials.
- Reduce impervious areas on site at the facility to promote onsite infiltration of stormwater runoff.

Good Housekeeping

- Keep your facility free of litter and debris.
- Provide adequate trash containers and other approved methods of disposal.
- Ensure there are no spills or leaks in your parking areas.
- Direct indoor floor drains and outdoor wash areas to the sanitary sewers.
- Store chemicals or hazardous substances or materials in secured and covered areas.
- Conduct loading and unloading in adequately covered areas free of spills and debris.
- Ensure storage tanks have adequate secondary containment.
- Ensure spill response supplies/kits are available and personnel are trained on how to use them.
- Ensure drainage infrastructures are cleaned and free of debris.
