Construction Notice Planned Trench Excavation

The DeKalb County Department of Watershed Management's Office of Engineering & Construction Management Services (ECMS) has initiated the Thompson Mill Water Main Replacement Project to make improvements to the watershed system in your community.

Please be advised that construction crews are planning trench excavation work along the public right-of-way that border the front of your property. The street will be open during construction, however residents should expect minimal, temporary delays accessing properties. The excavation will be covered or filled at the end of each day for driveways and streets to be passable. During active construction in your area, on street parking should be limited. **Work is scheduled to begin in the next 48 hours.**

Our construction crews will work diligently to restore your area and minimize the length of impact to residents. Also, please note all staff working on behalf of DeKalb County will have proper identification and will drive marked contractor vehicles.

All inquiries about this project should be directed to projectinfo@dekalbcountyga.gov or 1-800-986-1108.

We appreciate your patience as we work diligently to make improvements to DeKalb County's water distribution system.
