Department of Watershed Management

Construction Notice

Water Infrastructure Sterilization

The DeKalb County Department of Watershed Management's Office of Engineering & Construction Management Services (ECMS) has initiated a project to make improvements to the watershed system in your community.

Please be advised to expect workers in the area as the county and its contractors will need to sterilize the newly-installed pipes in your community. Residents may experience water running down the street temporarily as construction crews open fire hydrants for water to purge out of the pipes. This process is called flushing and will result in better water quality.

Work in your area is scheduled to begin at 11 a.m. Flushing is expected to last up to 8 hours.

Our construction crews will work diligently to minimize the length of impact to residents. Also, please note all staff working on behalf of DeKalb County will have proper identification and will drive marked contractor vehicles.
