

Subject: Peachtree Boulevard Water Transmission Main Project Update: Oct. 23, 2025

Dear Residents/Business Owners,

This morning, some in the Peachtree Malone Lofts may have experienced a brief disruption as crews conducted testing to determine if the line was active. If you experience brown water or air, please run your water until it is clear. We apologize for any inconvenience this may have caused.

This week, excavation work continues in front of the Peachtree Malone Lofts, and testing is scheduled for next week. We remain on schedule, with an estimated three to four weeks remaining before the Malone Drive/Peachtree Road intersection is fully reopened.

Paving on Malone Drive is expected to begin early next week. During this phase, traffic will be reduced to a single lane, and flaggers will be on site to help direct vehicles safely through the area. We encourage residents and travelers along Malone Drive to allow extra travel time, as minor delays are possible.

We appreciate your patience and understanding as we work to complete these improvements.
