Agenda Item

File #: 2019-3532
File Status: Preliminary Item

5/28/2019

Public Hearing: YES NO **Department:** Planning & Sustainability

SUBJECT: Rezone - Greg Ramsey

COMMISSION DISTRICT(S): 2 & 6

Application of Greg Ramsey to rezone property from R-100 (Residential-Medium Lot-100) to RSM (Small Lot Residential Mix) to develop 21 urban single-family detached dwelling units, at 3398 Briarcliff Road.

PETITION NO: N6. Z-19-1243163

PROPOSED USE: 21 urban single-family detached homes.

LOCATION: 3398 Briarcliff Road, Atlanta.

PARCEL NO. : 18-195-09-002

INFO. CONTACT: Marian Eisenberg

PHONE NUMBER: 404-371-4922

PURPOSE:

Application Z-19-1243163 of Greg Ramsey to rezone property from R-100 (Residential-Medium Lot-100) to RSM (Small Lot Residential Mix) to develop 21 urban single-family detached dwelling units. The property is located on the northwest side of Briarcliff Road, approximately 229 feet east of Branch Bend, at 3398 Briarcliff Road, Atlanta. The property has approximately 668 feet of frontage on Briarcliff Road, approximately 60 feet of frontage on Continental Drive and contains 8.7 acres.

RECOMMENDATIONS:

COMMUNITY COUNCIL: FULL CYCLE DEFERRAL.

PLANNING COMMISSION: APPROVAL WITH CONDITIONS.

PLANNING STAFF: APPROVAL WITH CONDITIONS.

STAFF ANALYSIS: The zoning proposal is consistent with housing policy No. 9 of the 2035 Comprehensive Plan to “. . . provide a variety of housing opportunities and choices to better accommodate the needs of residents.” It is consistent with the following natural resources policies: “Protect environmentally-sensitive areas including wetlands, floodplains, water supply watersheds, and stream corridors.” (No. 1) “Preserve trees

and other natural resources to protect the environment and aesthetically enhance communities.” (No. 4) “Encourage the preservation of open space, farmland, and natural and critical environmental areas.” (No. 6) At 2.5 units per acre, the proposed density of the development is lower than that of the surrounding neighborhoods, which are developed at R-100 densities. The comparatively low density of the proposed development is suitable in the context of the use of adjoining and nearby properties. The zoning proposal is supported by a growing recognition that continued urbanization of the County heightens the need to restore large green spaces, such as that which would be provided in the proposed development, to the County’s natural resource inventory. Moreover, urbanization has led to traffic congestion and has deteriorated levels of service on arterials such as Briarcliff Road, which is documented in the 2014 Comprehensive Transportation Plan as having a PM peak-hour level of service “F” for most of its distance between North Druid Hills Road and Shallowford Road. The need to alleviate congestion on Briarcliff Road supports the proposal in that it lowers the allowed density of the property and proposes a way to distribute traffic onto the network of neighborhood streets that feed into Briarcliff Road. There has been no indication from reviewing agencies and divisions that the proposed development would overburden the public transportation, school, or utility infrastructure. Therefore, the Department of Planning and Sustainability recommends “Approval with conditions”.

PLANNING COMMISSION VOTE: Approval with Conditions, 9-0-0. A. Atkins moved and J. West seconded for approval as recommended and conditioned by Staff.

COMMUNITY COUNCIL VOTE/RECOMMENDATION: Full cycle deferral, 6-0-0. The Community Council Board recommended full cycle deferral to allow time for the applicant to address comments by neighbors, who objected to access from Continental Drive. Neighbors also objected to removal of trees for construction of the proposed development.

Recommended Conditions

Z-19-1243163

Rezone Property from R-100 (Residential-Medium Lot-100) to
RSM (Small Lot Residential Mix)

May-~~16~~21, 2019

1) The subject property shall be developed in substantial conformity with the lot layout, allocation and distribution of open space, and location of amenities shown on the site plan titled, "Zoning Plan for the Pendergrast Historic Farm", prepared by JVG Civil Engineering, dated 9/12/17, revised 2/27/19 and 3/7/19, and stamped as received by the Department of Planning and Sustainability on March 7, 2019. As shown by the Project Open Space Exhibit included on said site plan, the use of land on the property shall be as follows:

- a) 2.58 acres - Area A – (proposed development area) - homes, parking, vehicular circulation.
- b) 3.88 acres - Area B1 – (buildable preserved area) – recreational amenities and gardens.
- c) 2.23 acres - Area B2 – (non-buildable preserved area) - the stream buffer and the area between the stream buffer and the west property lines, with a walking trail.

Notes:

Total site acreage - 8.7 acres.

Total preserved area (B1 & B2) – 6.11 acres or 70% of total site acreage.

Net site acreage after nonbuildable preserved area (B2) is subtracted – 6.47 acres.

Remaining open space (B1) = 3.88 acres or 60% of net site acreage.

- 2) A mandatory homeowners' association will be established to manage the common open space and the proposed gardener/caretaker dwelling unit.
- 3) Prior to issuance of the final plat for the proposed development, an initial offering will be made to an entity other than the homeowners' association to place a permanent conservation easement ~~will be placed~~ on the common open space depicted on the site plan as Area B1 and Area B2, which shall allow use of the open space only for gardening, recreation, woodland conservation, and similar and related uses of a non-commercial nature, ~~and which shall be held by an entity other than the homeowners' association.~~ Documents for the conservation easement shall be filed with the County Clerk and referenced on the final plat as both a verbal citation and an outline on the plat of Areas B1 and B2 .
- 4) No vehicular through-circulation shall be allowed between Briarcliff Rd and Continental Drive.
- 5) The primary storm water detention facility shall be installed underground.
- 6) The primary means of ingress and egress by construction-related vehicles will be from

Briarcliff Road.

7) The approval of this rezoning application by the Board of Commissioners has no bearing on other approvals by the Zoning Board of Appeals or other authority, whose decision should be based on the merits of the application before said authority.

~~8) A minimum of 38.25% of the property (after subtracting the stream buffer which is identified as Area B2 on the site plan cited in Condition No. 1) shall be open space and shall be enhanced with a clubhouse and associated amenities, a green, and a greenway with a trail through a stand of trees.~~

9)8) Each member of the homeowners' association shall be allowed to sponsor up to two members that shall have pedestrian access to the open space and all benefits of use of the amenities of the open space. The sponsored members shall reside on property located within ¼ mile of the subject property. Sponsored members shall apply for membership in the homeowners' association and shall not be refused membership if they live within one-quarter mile of the subject property, but may be terminated from membership if they violate any rule of the homeowners' association (other than the rule that qualifies members as a result of residing on the property) that is also applicable to members who qualify by virtue of residing on the subject property.

10)9) The homeowners' association shall operate ~~a community garden (also know as an "urban garden")~~ as defined in Section 27-4.2.55 of the DeKalb County Code, for a minimum of four month of the first twelve months that occur after issuance of the final certificate of occupancy, subject to all the requirements of Section 27-4.2.55. Sponsored members of the homeowners' association may obtain produce from the urban garden.

STAFF ANALYSIS

Case No.: Z-19-1243163 **Agenda #:** N. 6

Location/Address: 3398 Briarcliff Road **Commission District:** 2 **Super District:** 6

Parcel ID(s): 18-195-09-002

Request: To rezone property from R-100 (Residential-Medium Lot-100) to RSM (Small Lot Residential Mix) to develop 21 urban single-family detached dwelling units.

Property Owner(s): Walter, Jeff, and David Pendergrast

Applicant/Agent: Greg Ramsey

Acreage: 8.7 acres

Existing Land Use: A single-family residence.

Surrounding Properties: Single-Family Residential

Adjacent Zoning: **North:** R-100 **South:** R-100 **East:** R-100 **West:** R-100 **Northeast:** R-100
Northwest: R-100 **Southeast:** R-100 **Southwest:** R-100

Comprehensive Plan: Suburban **Consistent** **Inconsistent**

Proposed Density: 2.4 units/acre	Existing Density: .11 units/acre
Proposed Units: 21	Existing Units: One
Proposed Lot Coverage: 30%	Existing Lot Coverage: (Estimated) less than 5%

SITE AND PROJECT ANALYSIS

The subject property is a 8.7-acre tract of land that is developed with a single-family detached house. DeKalb County records indicate that the house was constructed in 1946. The application describes the property as a remnant of a farm that has been owned by three generations of the Pendergrast family. The property has approximately 668 feet of street frontage on Briarcliff Road, a two-lane minor arterial, and approximately 60 feet of frontage on Continental Drive, a dead-end local street. The center of the property has been cleared for lawns around the house, a swimming pool behind the house, and a tennis court to the southwest side of the house. The remainder of the property is wooded with mature trees. The topography of the property slopes in a northeast to southwest direction. A branch of North Fork Peachtree Creek crosses the southwest side of the property.

Vehicular access to the property is provided by a driveway from Briarcliff Road. Neither the Briarcliff Road frontage nor the Continental Drive frontage have sidewalks or other forms of streetscaping.

The proposal is to redevelop the property with a twenty-one unit “conservation community” that clusters the homes in the northern portion of the site, so that the majority of the property can be left substantially in its existing or natural state. The site plan shows large areas around the perimeter of the site that would remain wooded. Cleared areas in the center of the site would be used for gardens, a water feature, community gathering spaces, and amenities, including a “Green” (i.e., a common lawn), a plaza, a lap pool, and a club house.

While twenty of the units would be clustered at the northern end of the site, one unit would be located near Briarcliff Road. It is intended to provide a home for a gardener or caretaker. A driveway from Briarcliff Road would provide vehicular access to only this home.

Primary vehicular access to the site would be provided at the north end of the property, via Continental Drive. The twenty homes at the north end of the site would front on a private drive that would be designed to allow both pedestrian access to the homes as well vehicular access to ground floor garages and/or carports. The site plan includes an unpaved trail that would allow for pedestrian circulation throughout the project site.

LAND USE AND ZONING ANALYSIS

Section 27-832 of the Zoning Ordinance, “Standards and factors governing review of proposed amendments to the official zoning map” states that the following standards and factors shall govern the review of all proposed amendments to the zoning maps.

- A. Whether the zoning proposal is in conformity with the policy and intent of the comprehensive plan:** The zoning proposal is consistent with housing policy No. 9 of the 2035 Comprehensive Plan to “. . . provide a variety of housing opportunities and choices to better accommodate the needs of residents.” It is consistent with the following natural resources policies: (No. 1) “Protect environmentally-sensitive areas including wetlands, floodplains, water supply watersheds, and stream corridors.” (No. 4) “Preserve trees and other natural resources to protect the environment and aesthetically enhance communities.” (No. 6) “Encourage the preservation of open space, farmland, and natural and critical environmental areas.”
- B. Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby properties:** At 2.5 units per acre, the proposed density of the development is lower than that of the surrounding neighborhoods, which are developed at R-100 densities. The comparatively low density of the proposed development is suitable in the context of the use of adjoining and nearby properties.
- C. Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned:** The property to be affected by the zoning proposal has reasonable economic use as currently zoned for single-family detached homes at R-100 densities; however, this conclusion does not negate the reasonableness of the proposal to rezone the property.
- D. Whether the zoning proposal will adversely affect the existing use or usability of adjacent or nearby property:**
Because vehicular ingress and egress is proposed only from Continental Drive, the proposed development will result in an increase in vehicular trips on Continental Drive. However, impacts on individual properties may have to be weighed against the impacts to the larger community of developing the property with ingress and egress at Briarcliff Road, and the benefits to the larger community of developing the property at almost half the density that would be allowed under its current zoning classification.
- E. Whether there are other existing or changing conditions affecting the use and development of the property, which give supporting grounds for either approval or disapproval of the zoning proposal:**

The zoning proposal is supported by a growing recognition that continued urbanization of the County underscores the need to restore large green spaces, such as that which would be provided in the proposed development, to the County’s natural resource inventory. At the same time, urbanization has led to traffic congestion and has deteriorated levels of service on arterials such as Briarcliff Road, which is documented in the 2014 Comprehensive Transportation Plan as having a PM peak-hour level of service “F” for most of its distance between North Druid Hills Road and Shallowford Road. The need to alleviate congestion on Briarcliff Road supports the proposal in that it lowers the allowed density of the property and proposes a way to distribute traffic onto the network of neighborhood streets that feed into Briarcliff Road.

F. Whether the zoning proposal will adversely affect historic buildings, sites, districts, or archaeological resources:

There are no officially-registered historic buildings, sites, districts, or archaeological resources on or near the subject property.

G. Whether the zoning proposal will result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools:

The Department of Public Works Traffic Engineering Division has commented that the proposed development would not impair traffic flow on surrounding streets. The Land Development Division has commented to the effect that the proposed development exceeds the minimum for recommended quantities of undisturbed area necessary to properly manage stormwater runoff and water quality. There has been no indication that the proposed development would overburden sewer and water facilities.

H. Whether the zoning proposal adversely impacts the environment or surrounding natural resources:

The 2035 Comprehensive Plan identifies shrinking green spaces due to development as a continuing trend. It asserts a goal to “Preserve trees and other natural resources to protect the environment.” (Natural Resource Policy No. 4) The proposal under consideration offers an opportunity to exceed levels of tree preservation and natural resource conservation that are typically proposed when a property is rezoned for a single-family subdivision.

Compliance with District Standards:

RSM STANDARD	REQUIRED/ALLOWED	PROVIDED/PROPOSED	COMPLIANCE
MAX. UNITS/ACRE	Base: 4; with bonuses up to 8 units/acre	2.5 units/acre	Yes
MIN. OPEN SPACE /ENHANCED OPEN SPACE (Applicable if project is > 5 ac. or ≥36 units)	20%/10%	70%/70%	Yes
MIN. LOT AREA	1,350 square feet	2,000 – 4,000 square feet	Yes
MIN. LOT WIDTH	25 feet	30 – 60 feet	Yes
MAX. LOT COVERAGE (of total parcel acreage)	70%	30%	Yes

RSM STANDARD	REQUIRED/ALLOWED	PROVIDED/PROPOSED	COMPLIANCE	RSM STANDARD
BUILDING SETBACKS	FRONT W/O ALLEY (Suburban Char. Area) Units 15, 17, 18, 19, & 20	Min. 20 ft.	15 feet	ZBOA variances will be necessary.
	FRONT W/ALLEY	Min. 10 feet	10 feet	Yes
	INTERIOR SIDE	3 ft. w/min. 10 ft. between bldgs.	3 ft. w/min. 10 ft. between bldgs.	Yes
	REAR W/O ALLEY Units 15, 17, 18, 19, & 20	20 feet	12 feet	Yes
MINIMUM UNIT SIZE	1,100 square feet	1,600 – 3,000 square feet for all units except Gardener/Caretaker dwelling unit, which will be min. 1,100 square feet.	Yes	
MAX. BLDG. HEIGHT	3 stories or 45 feet, whichever is less when stories are measured in feet	35 – 45 feet	Yes	
PARKING	Min. 2 spaces per unit = min. 42 spaces total.	Min. 2 spaces per unit and 15 guest parking spaces	Yes	
MIN. STREETScape DIMENSIONS – OVERALL SITE (BRIARCLIFF RD FRONTAGE)	10-ft. landscape strip and 6-ft. sidewalk; street trees 50 feet on center.	None provided.	An administrative variance will be necessary.	
MIN. STREETScape DIMENSIONS - PRIVATE DRIVES	5-ft. landscape strip and 5-ft. sidewalk on each side; street trees 50 feet on center or for every unit, whichever distance is less.	Shared vehicular/pedestrian street with no landscape strip or street trees.	ZBOA variances will be necessary.	
TRANSITIONAL BUFFERS	20-ft. buffer & screening fence required along northeast and northwest property lines next to R-100 properties.	20-foot buffer & no screening fence at buffer line	ZBOA variance may be necessary.	
PARKING	Urban s-f detached – min. 2, max. 4 spaces per unit = min. 42, max. 84	57 spaces	Yes	

QUALITY OF LIFE METRICS

Open Space: 6.23 acres (71.6%)

Linear Feet of New Sidewalk or Trails: over 2,500 linear feet.

STAFF RECOMMENDATION: APPROVAL WITH CONDITIONS.

The zoning proposal is consistent with housing policy No. 9 of the 2035 Comprehensive Plan to “. . . provide a variety of housing opportunities and choices to better accommodate the needs of residents.” It is consistent with the following natural resources policies: “Protect environmentally-sensitive areas including wetlands, floodplains, water supply watersheds, and stream corridors.” (No. 1) “Preserve trees and other natural resources to protect the environment and aesthetically enhance communities.” (No. 4) “Encourage the preservation of open space, farmland, and natural and critical environmental areas.” (No. 6) At 2.5 units per acre, the proposed density of the development is lower than that of the surrounding neighborhoods, which are developed at R-100 densities. The comparatively low density of the proposed development is suitable in the context of the use of adjoining and nearby properties. The zoning proposal is supported by a growing recognition that continued urbanization of the County heightens the need to restore large green spaces, such as that which would be provided in the proposed development, to the County’s natural resource inventory. Moreover, urbanization has led to traffic congestion and has deteriorated levels of service on arterials such as Briarcliff Road, which is documented in the 2014 Comprehensive Transportation Plan as having a PM peak-hour level of service “F” for most of its distance between North Druid Hills Road and Shallowford Road. The need to alleviate congestion on Briarcliff Road supports the proposal in that it lowers the allowed density of the property and proposes a way to distribute traffic onto the network of neighborhood streets that feed into Briarcliff Road. There has been no indication from reviewing agencies and divisions that the proposed development would overburden the public transportation, school, or utility infrastructure. Therefore, the Department of Planning and Sustainability recommends “Approval” with the following conditions:

1. The subject property shall be developed in substantial conformity with the lot layout, allocation and distribution of open space, and location of amenities shown on the site plan titled, “Zoning Plan for the Pendergrast Historic Farm”, prepared by JVG Civil Engineering, dated 9/12/17, revised 2/27/19 and 3/7/19, and stamped as received by the Department of Planning and Sustainability on March 7, 2019.
2. A mandatory homeowners association will be established to manage the common open space.
3. A permanent conservation easement will be placed on the common open space which shall allow use of the open space only for gardening, recreation, woodland conservation, and similar and related uses of a non-commercial nature.
4. No vehicular through-circulation shall be allowed between Briarcliff Rd and Continental Drive.
5. The primary storm water detention facility shall be installed underground.
6. The primary means of ingress and egress by construction-related vehicles will be from Briarcliff Road.
7. The approval of this rezoning application by the Board of Commissioners has no bearing on other approvals by the Zoning Board of Appeals or other authority, whose decision should be based on the merits of the application before said authority.

NEXT STEPS

Following an approval of this zoning action, one or several of the following may be required:

- ✔ • **Land Disturbance Permit** *(Required for of new building construction on non-residential properties, or land disturbance/improvement such as storm water detention, paving, digging, or landscaping.)*
- ✔ • **Building Permit** *(New construction or renovation of a building (interior or exterior) may require full plan submittal or other documentation. Zoning, site development, watershed and health department standards will be checked for compliance.)*
- ✔ • **Certificate of Occupancy** *(Required prior to occupation of a commercial or residential space and for use of property for a business. Floor plans may be required for certain types of occupants.)*
- **Plat Approval** *(Required if any parcel is being subdivided, re-parceled, or combined. Issued “administratively”; no public hearing required.)*
- ✔ • **Sketch Plat Approval** *(Required for the subdivision of property into three lots or more. Requires a public hearing by the Planning Commission.)*
- **Overlay Review** *(Required review of development and building plans for all new construction or exterior modification of building(s) located within a designated overlay district.)*
- **Historic Preservation** *(A Certificate of Appropriateness is required for any proposed changes to building exteriors or improvements to land when located within the Druid Hills or the Soapstone Geological Historic Districts. Historic Preservation Committee public hearing may be required.)*
- ✔ • **Variance** *(Required to seek relief from any development standards of the Zoning Ordinance. A public hearing and action by the Board of Appeals are required for most variances.)*
- **Minor Modification** *(Required if there are any proposed minor changes to zoning conditions that were approved by the Board of Commissioners. The review is administrative if the changes are determined to be minor as described by Zoning Code.)*
- **Major Modification** *(Required submittal of a complete zoning application for a public hearing if there are any proposed major changes to zoning conditions that were approved by the Board of Commissioner for a prior rezoning.)*
- **Business License** *(Required for any business or non-residential enterprise operating in Unincorporated DeKalb County, including in-home occupations).*
- **Alcohol License** *(Required permit to sell alcohol for consumption on-site or packaged for off-site consumption. Signed and sealed distance survey is required. Background checks will be performed.)*

Each of the approvals and permits listed above requires submittal of application and supporting documents, and payment of fees. Please consult with the appropriate department/division.

To: Furman, Melora L.
Subject: RE: Materials for Review of Zoning Application Z-19-1243163

Hello Melora,

These are the Storm Water Management suggestions for the 21 unit single family development at 3398 Briar Cliff Road. Zoned R-100 , Parcel ID# 18 195 09 002.

- (1) Maintain the 75 feet stream buffer throughout the development.
- (2) Minimize all impact on the stream buffer during and after completion of the Development.
- (3) Water quality pond is required .
- (4) Institute Bio –engineering design to reduce storm water runoff from the site and possible to reduce the size of the detention pond,while providing additional green space in the development.
- (5) 30% of the development area should be left undisturbed in its natural state.
- (6) Provide ground water recharge with pervious pavements and infiltration trenches as per 14-43 and 14-40(b)(16)E

N1. The access points shown represent the latest discussions that I have been involved with. Right in/Right out only onto Briarcliff. Would like to see that right out designed in such a way to better physically restrict the left movement. Left in/Right out only onto Biltmore. No restrictions at Clifton Road and Biltmore Road. Engineer is to ensure that all access point movements have the required intersection and stopping sight distances. Briarcliff is SR 42 and a minor arterial. Requires GDOT review and approval. Juhatch@dot.ga.gov. Clifton Road is also classified as a minor arterial. DeKalb Zoning Code and Land Development Code requires a right of way dedication of 40 feet from centerline (or all public infrastructure on right of way, whichever greater), bike lanes, 6 foot sidewalk, and 10 foot landscape strip. Biltmore Rd is classified as a local road. Local roads require a 27.5 right of way dedication from centerline, a 5 foot sidewalk and a 10 foot landscape strip. Pedestrian scale street lights are required on all frontages. It appears that some of the construction along the taper on Biltmore is not within current county right of way or on property that the owner controls.

N2. No comments.

N3. Limit access point on Flat Shoals Road to Right in/right out. Flat Shoals Road is classified as a minor arterial. Engineer is to ensure that all access point movements have the required intersection and stopping sight distances. DeKalb Zoning Code and Land Development Code requires a right of way dedication of 40 feet from centerline (or all public infrastructure on right of way, whichever greater), bike lanes, 6 foot sidewalk, and 10 foot landscape strip. Pedestrian scale street lights are required on all frontages. Keystone Dr is classified as a local road. Local roads require a minimum 27.5 right of way dedication from centerline, a 5 foot sidewalk and a 10 foot landscape strip. Pedestrian scale street lights are required on all frontages. Ensure that the developer has an access easement with the Brighten Village property owners to use their streets. Public sidewalks must be on right of way. Project signage is not allowed on right of way. Ensure that existing sidewalk meets current ADA standards and is in a state of good repair, otherwise replace.

N4. No comments.

N5. The interior street is required to be private. Site plan is unreadable. Where are the five (5) townhomes in the rear going to park? Glenwood Ave is a minor arterial. DeKalb Zoning Code and Land Development Code requires a right of way dedication of 40 feet from centerline (or all public infrastructure on right of way, whichever greater), bike lanes, 6 foot sidewalk, and 10 foot landscape strip. Pedestrian scale street lights are required on frontage.

→ N6. Briarcliff Road is classified as a minor arterial. DeKalb Zoning Code and Land Development Code requires a right of way dedication of 40 feet from centerline (or all public infrastructure on right of way, whichever greater), bike lanes, 6 foot sidewalk, and 10 foot landscape strip. Continental Drive is classified as a local road. Local roads require a 27.5 right of way dedication from centerline, a 5 foot sidewalk and a 10 foot landscape strip. Pedestrian scale street lights are required on all frontages. The connection to Continental Drive will need to be shifted so that the back of curb is not on the property line. There needs to be room for utilities. At a minimum, there should be at least a 10 foot shoulder between the back of curb and the property line.

April 9, 2019

Dear Council Members:

The property owners neighboring the proposed Pendergrast Farm development would like to convey that, as a whole, they support the conservation aspirations in the proposed Rezoning Application. However, they do not support the proposal in its current form and have several concerns related to ingress/egress, emergency response time, and parking.

First, the proposed rezoning may not provide adequate access for emergency vehicles via the Continental Drive ingress/egress. The Applicant has indicated that the proposed units are being marketed to aging residents as an option for downsizing their current housing needs. The drive time from Briarcliff Road to the proposed ingress/egress, through the convoluted streets, is considerably longer.

Second, the proposed ingress/egress will most certainly create additional traffic via Fischer Trail and Chrysler Drive that would produce unsafe road conditions for pedestrians in the immediate area, including walkers, babies in strollers, and joggers.

Third, the proposed ingress/egress could lead to overflow vehicle parking along Continental Drive. The number of parking spaces proposed for the 1600 to 3000 square foot units may be insufficient. Overflow parking will certainly cause further congestion and impede emergency service access.

We believe that alternative plans could be developed with an entry from Briarcliff Road, that enables the developer to maintain the desired conservation characteristics, including the preservation of pervious surfaces. In conclusion, the undersigned neighboring property owners believe the safest and best access to the proposed development would be an ingress and egress via Briarcliff Road. We respectfully ask you to consider these issues in your deliberations.

Dear Council Members:

The property owners neighboring the proposed Pendergrast Farm development would like to convey that, as a whole, they support the conservation aspirations in the proposed Rezoning Application. However, they do not support the proposal in its current form and have several concerns related to ingress/egress, emergency response time, and parking.

First, the proposed rezoning may not provide adequate access for emergency vehicles via the Continental Drive ingress/egress. The Applicant has indicated that the proposed units are being marketed to aging residents as an option for downsizing their current housing needs. The drive time from Briarcliff Road to the proposed ingress/egress, through the convoluted streets, is considerably longer.

Second, the proposed ingress/egress will most certainly create additional traffic via Fischer Trail and Chrysler Drive that would produce unsafe road conditions for pedestrians in the immediate area, including walkers, babies in strollers, and joggers.

Third, the proposed ingress/egress could lead to overflow vehicle parking along Continental Drive. The number of parking spaces proposed for the 1600 to 3000 square foot units may be insufficient. Overflow parking will certainly cause further congestion and impede emergency service access.

We believe that alternative plans could be developed with an entry from Briarcliff Road, that enables the developer to maintain the desired conservation characteristics, including the preservation of pervious surfaces. In conclusion, the undersigned neighboring property owners believe the safest and best access to the proposed development would be an ingress and egress via Briarcliff Road. We respectfully ask you to consider these issues in your deliberations.

ADDENDUM - LETTER OF SUPPORT
1ST COMMUNITY MTG - CLOSE BY NEIGHBORS

May 23, 2018

Greg Ramsey
Village Habitat Design
483 Moreland Avenue, NE, Suite #4
Atlanta, GA 30307

Dear Greg,

I write to thank you for meeting with my neighbors and me last evening to describe the conservation community approach being considered for the Pendergrast property at the end of Continental Drive. I wanted you to know that there were nineteen of us present, representing twelve households on Continental and Imperial, and that at the end of our time together we came to consensus that the conservation approach would be vastly superior to the conventional R-100 subdivision approach to redevelopment of that property. We support what you and your clients are working to achieve and would be supportive of redevelopment that follows the plan that you shared with us.

Sincerely,

Jim Durrett
2028 Continental Drive

Subject: District 2 Rezoning - Pendergrast Farm - Community Meeting

District 2 Community Council Members,
Pendergrast Farm LLC is rezoning the 8.7 acre property at 3398 Briarcliff Rd. NE Atlanta, GA 30345 from R100 to RSM - site plan specific/conservation community. The intent of the RSM - site plan specific conservation community rezoning is to preserve the majority of the buildable area as green space for gardens and woodlands by substituting smaller lots for the R100 lots.

A preliminary community meeting was held in 2018 with the close by neighbors and at that meeting the neighbors supported the rezoning and were excited about the conservation effort.

A follow up community meeting will be held on Feb 27, 2019 at 2107 Imperial Dr. NE, Atlanta, Ga 30345 at 7PM.

Pendergrast Farm LLC sent out a notice to the neighborhood 15 days prior to Feb 27 date and recently met for the pre-application zoning meeting with Dekalb County and they suggested we send an invitation to you all as well.

Please let me know if you have any questions, thank you,

Greg Ramsey
Director - Village Habitat Design

PENDERGRATS HISTORIC FARM - REZONING APPLICATION INTENT SUBMITTAL - 3.7.19

LETTER OF APPLICATION

Pendergrast Farm LLC is requesting that the subject 8.7 acre property be rezoned from R100 to RSM - USF/ site plan specific in order to allow a 21-unit development of single-family detached and 0 lot homes with a base density of 2.5 units per acre. The intent of the rezoning is to develop a conservation community, clustering 20 of the 21 dwelling units onto a maximum of 40% of the buildable area of the site (2.47 acres) preserving a total of 6.23 acres of the overall site.

Existing Property Use

The 8.7 acre property currently is zoned R100 and is occupied by a single family residence. The property is a remnant of the historic Pendergrast Farm of which 3 generations of Pendergrasts are living today. Two of those generations worked on the historic farm and their desire is to leave a legacy of the original farm - to preserve the majority of the buildable area of the site protecting woodlands and maintaining a substantial garden.

Proposed Property Use

The proposed use is to remove the single family residence and build 20 market rate DU's and 1 affordable DU for the resident gardener.

The 8.7 acre parcel is comprised of 2.23 acres of non-buildable area (stream buffer and flood plain) and 6.23 acres of buildable area. The 20 market rate DU's will be developed as a conservation cluster on a maximum of 2.47 acres (40% of the buildable area) preserving the remainder of the buildable area (4 acres) as open space for woodlands, gardens and expanded stream protection. Combined with the 2.23 acres of non buildable flood plain and stream buffer area, a total of 6.23 acres will be preserved as open space.

The 20 DU conservation cluster will be used for residential purposes for residents and their guests and includes 20 DU's, a clubhouse and an activity green. The market for these units is initially oriented to senior residents living in the surrounding neighborhoods that are interested in downsizing their homes and yards and in having shared activities around the woodlands and gardens. A resident gardener and caretaker will manage the gardens and grounds.

Detailed Characteristics

The 20 DU conservation cluster is comprised of 1600 sf to 3000 sf 2 – 4 bedroom homes built on 2000 to 4000 sf lots with accessory dwelling units. Homes on the periphery will have a maximum height of 35ft with the ability and the other homes will have a maximum building height of 45ft. Parking will accommodate 2 cars at each house and .75 separate parking spaces per unit in clustered parking for guests. The commons areas (clubhouse, activity green, gardens and natural woodland trails are for residents and their guests.

In addition to the 20 DU cluster, the 6.23 acre preserved area will contain a 1/2 to 1 acre garden area and accessory structures (greenhouse, shed for equipment and garden storage, etc.), one affordable DU for the resident gardener family (no minimum size) and woodland natural trails.

The HOA in conjunction with a conservation entity will be responsible for the ongoing maintenance of the commons and open space. A perpetual conservation easement will be placed on the open space.

PROJECT ANALYSIS

The subject property is an 8.7-acre site located on the north side of Briarcliff Road approximately 450 feet east of Branch Bend Road at 3398 Briarcliff Road in Atlanta Georgia, in Commission District 2 and Super District: 6. The land use is Suburban and the Parcel ID is 18-195-09-002

The Topography of the property gently slopes downward from the eastern edge of the property to the stream at the western edge of the property with a moderate slope from the northeast corner of the property to the north west corner of the property. The property is predominantly wooded with a mixed age forest and a large meadow at the center of the property.

The character of the area that surrounds the subject property is residential zoned R100 To the north, east,, west and south. The property is approximately .75 miles to the closest commercial area at the intersection of Briarcliff Road and Claremont Avenue.

The applicant proposes to demolish the single-family residence on the project site and construct 21 single-family detached and o lot homes.

Access and Transportation Considerations:

The southern edge of the property is bound by Briarcliff Road and the northern edge of the property connects to Continental Drive.

Access to the development would be provided by a private drive extended from Continental Drive. The single residence access from Briarcliff Road would be maintained to only access the gardener/caretaker residence at the south end of the property.

The driveway access from Briarcliff will be maintained as is to access a single family dwelling for the gardener/caretaker on the south end of the property. The portion of the existing driveway extending to the north side of the property beyond the proposed gardener residence will be removed. Only the gardener and pedestrian access will be permitted between the 20 DU conservation Cluster and the south side of the property.

LAND USE AND ZONING ANALYSIS

Section 27-832 of the Zoning Ordinance, "Standards and factors governing review of proposed amendments to the official zoning map" states that the following standards and factors shall govern the review of all proposed amendments to the zoning maps.

A. Whether the zoning proposal is in conformity with the policy and intent of the comprehensive plan:

The zoning proposal is consistent with the following policies and strategies of the 2025 Comprehensive Plan: "Protect stable neighborhoods from incompatible development that could alter established residential development patterns and density." (SCAP1), "Ensure that new development and redevelopment is compatible with existing residential areas." (LUP6)

B. Whether the zoning proposal will permit a use that is suitable in view of the use and development of adjacent and nearby properties:

Adjacent and nearby properties will benefit from this conservation community development. The residential character will be enhanced by the preservation of the woodlands and meadow and substantially increased stream buffer. The vast majority of the peripheral properties will have a much larger green space buffer than if the property were developed as an R100 development and the minimum peripheral buffer will be equal to the back yard buffer requirement for R100 (40ft).

C. Whether the property to be affected by the zoning proposal has a reasonable economic use as currently zoned:

As currently zoned the entirety of the property can be subdivided with minimum conservation of green space. This would not be an optimal economic use as the proposed conservation community will increase the economic value of the neighborhood due to its majority preservation of green space and equivalent economic revenue from development of homes.

D. Whether the zoning proposal will adversely affect the existing use or usability of adjacent or nearby property:

The zoning proposal will not adversely affect the existing use or usability of adjacent or nearby properties. Preserving approximately 60% of the buildable area of the property and 71% of the overall property will protect the long term quality of life for nearby residents as well as enhance the value of the nearby properties .

E. Whether there are other existing or changing conditions affecting the use and development of the property, which give supporting grounds for either approval or disapproval of the zoning proposal:

There are no other existing or changing conditions affecting the use and development of the property, The surrounding neighborhood is stable with good schools. The development of a conservation community in one of the last remaining larger undeveloped sites in the neighborhood will help further stabilize the residential character of the surrounding area by preserve wildlife habitats, water quality and scenic views.

F. Whether the zoning proposal will adversely affect historic buildings, sites, districts, or archaeological resources:

The zoning proposal will not adversely affect historic buildings, sites, districts, or archaeological resources.

The proposed zoning will leave the majority of the site open so that in the future there will be greater possibility for researching and commemorating the history of the site.

G. Whether the zoning proposal will result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools:

The zoning proposal will not result in a use which will or could cause an excessive or burdensome use of existing streets, transportation facilities, utilities, or schools. The impact of the development on infrastructure will be reduced and the majority of the potential buyers are seniors from the surrounding neighborhoods looking to downsize. This will reduce stress on traffic as well as schools.

H. Whether the zoning proposal adversely impacts the environment or surrounding natural resources:

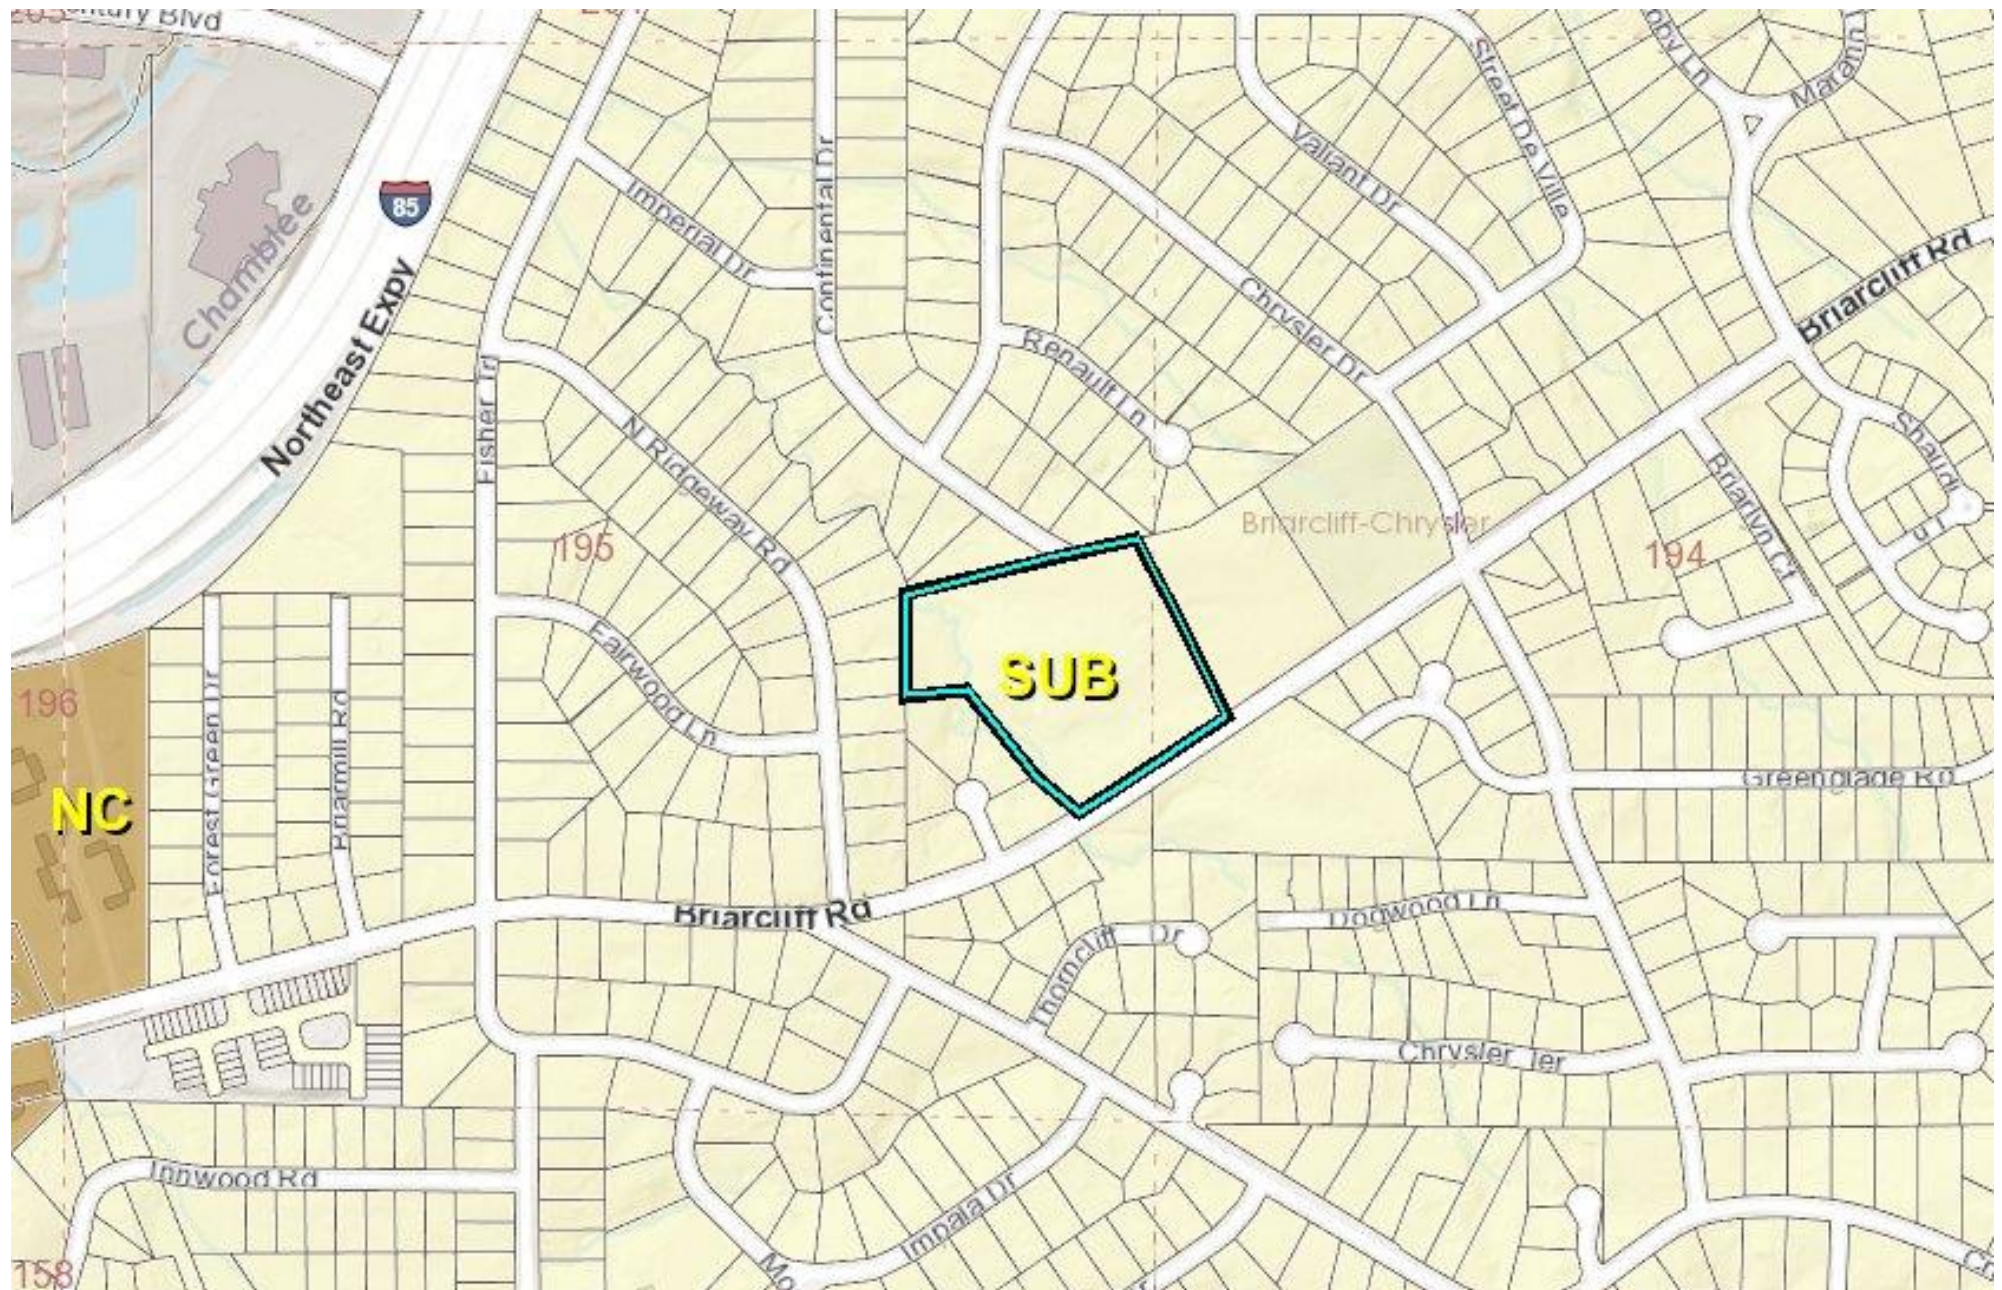

The proposed conservation community is designed to substantively protect the surrounding natural resources - protecting 60% of the buildable area of the site and 71% of the overall site that would otherwise be substantially graded under the present R-100 district - increasing the woodland protection, expanding the stream buffers and bringing urban agricultural gardens to the neighborhood.

Compliance with District Standards:

Note: The development is subject to sketch plat subdivision requirements.
